INSTALLATION INSTRUCTIONS FOR NETWORK LICENSE CODE

Activate License

Step 1: Install Hasp Updater

On the computer that will host the network license, install the <u>Trimble HASP License Updater</u> software. This is best to be a network server or a workstation that is always on the network in cases where you are planning to share the license. If this is a single license for exclusive use by a single computer, then it can be installed on that computer.

	Trimble HASP License Updater - InstallShield Wizard X						
	ď	Select the language for the in	stallation from the ch	oices below.			
3		English (United States)		~			
			OK	Cancel			

Step 2: Enter License Code Shown

If the software is not running it can be found at Start / Trimble / HASP License Updater. Click the 'Create a Software Key' button and enter the 19 digit code.
